Education

Nitte Meenakshi Institute of Technology (NMIT)
B.E. in Artificial Intelligence & Data Science - CGPA: 8.43 / 10.0

Bengaluru, KA
Sept 2024 – Aug 2027

Adichunchanagiri Institute of Technology
DIP in – Computer Science & Engineering-Percentile 78.8%

chikkamagaluru, KA
June 2021 – March 2024

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript.

Web Development: HTML5, CSS3, JavaScript (ES6+), React.js, Node.js, Express.js, REST APIs

Full Stack & Database: React.js, Node.js, Express.js- MongoDB MySQL, MongoDB, MongoDB Atlas

AI Tools: OpenAI API, Google AI Studio, Prompt Engineering

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Collab, Postman, Verel

Languages Known: English, Kannada, Hindi.

INTERNSHIP

Full Stack Developer Intern

Rank Book Academy

Jan 2024 – Apr 2024

- Built and deployed **responsive web applications** using HTML, CSS, JavaScript, Python, and MySQL, improving page load performance by **30%** through code optimization
- Designed and integrated **RESTful APIs** with backend services, reducing API response time by **25%** and ensuring seamless frontend-backend communication.
- Collaborated with a team using **Git and GitHub** for version control, successfully delivering **5+ feature enhancements** while maintaining clean and reusable code.

PROJECTS

Object Detection System - Python, YOLOv8, OpenCV, TensorFlow, Flask

Sep - 2025

- Developed a **real-time object detection system** using YOLOv8 and OpenCV to identify and classify multiple objects from images and live video streams, optimizing inference for high-speed detection and object tracking.
- Built a **Flask-based web interface** for live monitoring, detection visualization, and automated result management, providing an intuitive dashboard for real-time predictions.
- Tested the system on diverse datasets and real-world scenarios, improving detection reliability and achieving **90%+ accuracy** while ensuring scalability for smart surveillance applications.
- Optimized image preprocessing and inference pipelines, reducing detection latency by approximately 30% while maintaining high detection accuracy across different lighting and environmental conditions.

Car Booking Website | HTML, CSS, JavaScript, Python, MySQL

Apr - 2024

- Developed a **full-stack car booking platform** enabling users to browse available vehicles, book rentals, and manage reservations through a responsive web interface.
- Integrated a **MySQL database** to manage customer information, booking history, vehicle availability, and secure user authentication with CRUD operations.
- Implemented responsive UI design, input validation, and booking confirmation workflows, improving usability and ensuring a seamless experience across desktop and mobile devices.
- Implemented search, filtering, and booking status management features, improving user experience and enabling efficient vehicle availability tracking and reservation management.

Animal Intrusion Detection System | Python, YOLOv8, OpenCV, Flask, MySQL

Feb - 2026

- Developed a **real-time animal intrusion detection system** using YOLOv8 and OpenCV to detect and track wild animals in restricted agricultural and forest areas.
- Built a **Flask-based monitoring dashboard** integrated with MySQL to store detection logs, captured images, timestamps, and intrusion history for analysis and reporting.
- Implemented live video streaming, automated alerts, and object tracking, enabling continuous surveillance and reducing manual monitoring efforts while improving response time to intrusion events.

CERTIFICATIONS

- Science of Happiness and Wellbeing – IIT Madras (NPTEL)
- Full Stack Developer at Rank Book Academy
- Deep Learning for Developers – Infosys's Platform

Apr 2026
Jan – Apr 2024
Mar- 2026
